SUMMARY

Self-taught full-stack developer shipping production-grade systems solo — AI platforms, satellite tracking dashboards, NLP tools, and encrypted mobile apps. Comfortable owning frontend, backend, database, and deployment end-to-end. Four shipped products with real users.

PROJECTS

MansHDynamics SATELLITE OPS manshdynamics.vercel.app

- Real-time orbital traffic dashboard tracking 250+ satellites with SGP4 propagation and conjunction risk scoring
 - 3D WebGL globe with orbital path rendering, timeline scrubber (5x–60x), Kalman-filtered telemetry
- React · Three.js · WebGL · SGP4 · WebSockets · Canvas

Manshverse AI PLATFORM manshverse.site

- Poly-model AI ecosystem — intelligent prompt routing across Groq/Gemini, custom reasoning engine, 45+ persona modes
 - Subscription billing (UPI), admin dashboard, multi-platform delivery (Web + Android)
- React · Vite · Firebase · Groq API · Gemini API

ManshVoid COMPUTATIONAL LINGUISTICS manshvoid.vercel.app

- Cross-references 7,000+ languages to find or synthesize words for unnamed feelings via phonemic construction
 - Custom phoneme engine with vowel harmony, morphological synthesis, semantic topology mapping
- Vanilla JS · NLP Pipeline · Node.js · Phoneme Engine

Manspacium MOBILE APP

- Encrypted realtime messaging — socket-based, persistent conversations, JWT auth, mobile-native gestures
- React Native · Expo · Node.js · Prisma · PostgreSQL · Socket.io

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, Expo, Three.js, WebGL, GSAP, Framer Motion, TypeScript, Vite	Backend: Node.js, Express, Firebase, Prisma, PostgreSQL, WebSockets, Socket.io, REST, JWT, OAuth 2.0
AI & Data: Groq API, Gemini API, OpenAI API, Prompt Engineering, SGP4/TLE, Kalman Filters	Infra: Vercel, Netlify, EAS Build, Git, GitHub, CI/CD, Firebase Hosting, Linux

EDUCATION

Self-Taught · Full-Stack Development — Systems architecture, AI integration, orbital mechanics, NLP 2023 – Present
